

The operating system that you have selected required us to set a default password.
Unless you specified otherwise, the password on this system is:

Default Username: **user**

Default Password: **Password1!**

It is highly recommended that you change your password to ensure system security.

Instructions for Changing Passwords

To change an account password in Linux:

1. Open a terminal (ctrl+alt+T)
2. Type in "**sudo passwd [user]**" where **[user]** is either "user", "root" or the name of the user whose password you wish to change
3. Enter the current user password, the Puget Systems default is "Password1!"
4. Enter your new password
